DESCRIPTION

I am a computer engineering student, passionate in technology who dreams in the future to work in the world of AI and robotics. I consider myself a precise and determined person, able to work and cooperate with other people. I am currently interested in deepening my knowledge in machine learning, reinforcement learning, computer vision and robotics applied to AI.

SKILLS

- **Programming Languages:** C, C++, Java, Python, Kotlin
- **DL/ML Libraries:** PyTorch, Tensorflow, Keras, Scikit-Learn, Pandas
- **Computer Vision:** OpenCV
- **Big Data:** Spark
- **Databases:** MySQL, PostgreSQL, SQLite

LANGUAGES

Italian - Naive
English - B2 Level

EDUCATION

MSc in Computer Engineering - AI and Robotics

Department of Information Engineering, University of Padua

Oct. 2023 - In Progress

BSc in Computer Engineering

Department of Information Engineering, University of Padua

Thesis: Experimental evaluation of Monte Carlo approximation algorithms for PageRank

Sept. 2020 - Sept. 2023

High School Diploma - Computer Science

I.T.I.S. Enrico Fermi, Bassano Del Grappa (VI)

PROJECTS

Parking Lot Detection (2024)

Computer Vision Project, MSc Computer Engineering

Hate Speech Detection (2024)

Artificial Intelligence Project, MSc Computer Engineering

Lymphoma cancer classifier using Data Augmentation (2024)

Deep Learning Project, MSc Computer Engineering

CasHelper - Applicazione di aiuto per la gestione delle finanze (2023)

Programmazione di Sistemi Embedded, BSc Computer Engineering
